About Me

High-performance Full Stack Developer and Entrepreneur with a Higher Technical Degree in Web Application Development (Graduated with Honors). Co-founder of a digital agency specializing in high-velocity web deployment. Proven track record of delivering enterprise-grade solutions, from "Real Production" projects at Atos to managing parallel client workflows using modern AI-driven architectures. Expert in Next.js, Astro, and automation, combining technical precision with a business-first mindset.

Work Experience

Co-founder at Woffer | Jun 2025 - Present

- Co-founded a web development agency, spearheading the technical division while partnering on business strategy and automation.
- Methodology: Architected the "Vibecoding" workflow, utilizing AI tools and rigorous SOPs to reduce delivery times for static sites to under 48 hours without compromising quality.
- Capacity Management: Successfully manage an average of 3-4 active client projects simultaneously (peaking at 7), covering the full lifecycle: Intake → Setup → Design → Development → QA → Deploy.
- Tech Implementation: Migrated production workflows to a modern stack (Next.js 14, Astro, Supabase), resulting in high-performance, SEO-optimized client deliverables.
- Business Impact: Standardized pricing models and service packages, increasing average project value by 50% within the first year

Web Developer Intern at ATOS | Mar 2025 - Jun 2025

- High Achievement: Selected as a top-tier intern to bypass standard training and immediately join a live production team for a major client.
- Contributed to the development and maintenance of enterprise-scale software, ensuring code quality and adherence to strict industry standards.
- Collaborated in an Agile environment, resolving critical bugs and implementing new features in a complex codebase.

VIBECODING & TECHNICAL EXPERTISE

 **Vibecoding Methodology:** Consistently shipping production-ready sites in <48 hours through AI-assisted workflows and parallel project management.

 **Modern Frontend:** Advanced JavaScript, React, Angular, and Remix for building dynamic, high-performance user interfaces.

 **Robust Backend:** Architecting scalable microservices with Spring Boot (MVC, Data JPA, Security) and API REST.

 **AI & Automation:** Mastering Claude Code & Playwright MCP for automated QA and rapid prototyping.

 **Performance & Versatility:** Achieving 95+ PageSpeed scores. Proficient in Node.js, Python, and PHP for diverse backend needs.
